

Join ActivePlatform marketplace via single integration

Sell your cloud services globally

About ActivePlatform

ActivePlatform is a full-service automated cloud brokerage solution for cloud service providers and internal IT hubs that makes it easier to manage and control the cloud delivery and profitability

ActivePlatform enables SaaS, PaaS, IaaS aggregation, delivery, and monetization, provides simplified administration through central management and enables critical visibility into resellers and cloud services consumption and usage

The platform has implementations with distributors, cloud solution providers, and telecom operators. ActivePlatform is headquartered in Minsk, Belarus, with 4 global offices

ActivePlatform marketplace

ActivePlatform unites vendors, providers, developers, and resellers into a single ecosystem for buying, selling and managing cloud services

Applications and services from the marketplace can instantly become available via distributors and cloud providers on ActivePlatform in 50+ countries in CIS, Eastern Europe, and Middle East and Asia

Why should I partner with ActivePlatform?

ActivePlatform helps ISVs to build profitable business focused on cloud services. Adding your application to ActivePlatform marketplace gives you reach to all service providers in our ecosystem which operates in 50+ countries

How to add my cloud service to ActivePlatform?

ActivePlatform enables any service including IaaS, SaaS, and PaaS to be integrated into the global catalogue via vendor portal universal API, and to the local service provider catalogue via both universal API or a plugin using the platform SDK. To learn about publishing your application to ActivePlatform marketplace, please contact Aliaksandr Dzenisionak, ISV and Partnerships Manager, partner@activeplatform.com

How to work with marketplace?

A developer can interact with ActivePlatform marketplace via a Vendor Portal. It is a secure portal for product integration and management

Vendor Portal enables ISVs to integrate with ActivePlatform via universal API, add marketing materials, manage products and resellers, view information about product sales and subscriptions

How to start

Get ready to sell your product globally

1. Integrate your application to service catalogue via universal RESTful API or platform SDK. ActivePlatform team can do it for you (charges applied)
2. Sign contracts with cloud services providers so they can push your product to end customers
3. Manage your product offering, marketing and billing via Vendor Portal
